Increased activity has been displayed lately in the State of Morelos, where Federal General Robles has been given free hand to destroy the followers of Zapata. The newspapers to-day quote official reports from Morelos saying the state is free from rebels at last. reports say the last of them, including Zapata, have gone south into the State of Guerro. Large numbers moved north and are now almost encircling the capi-tal. The official explanation is that they chose this direction, other exits

More than eighty American refugees arrived on the Mexico, most of whom had been robbed and driven from their homes. None had a good word for Huerta, and all felt that American residents in Mexico would have had a better chance to save their lives and property if the United States had taken some definite action several months ago.

Special Session Discussed.

Mexico City, August 22.—The advisability of calling an extra session of Congress to deal with the situation growing out of the representations of President Wilson to Provisional President Huerta was discussed to-day by the permanent committee of Congress.

A proposed amendment to a resolution to call an extra session precipitated a debate. The amendment favored trying for sedition the introducers of the resolution.

Another amendment providing that the President report to the committee the nature of the negotiations with the United States government was offered by Manuel Juvers. Failure to pass this resolution under a suspension of the rules resulted in its being referred to a committee, which will be unable to report before next Friday's session, and since the regular session of Congress will begin September 15, the deputies believe the calling of a special session is improbable.
